

MOHAMMAD MUZAMMIL

Full Stack Developer

+91 8446411038 | muzammil844641@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Summary

Full Stack AI Developer with 3 deployed production applications, including an AI-powered RAG system used for real hospital appointment workflows. Builds end-to-end products spanning React/Node full stack development, FastAPI backend, and LangChain/LangGraph-based Generative AI pipelines — BCA graduate, 2026.

SKILLS

- **Frontend** : JavaScript (ES6+), React.js, HTML5, Tailwind CSS, React Native, Redux Toolkit
- **Backend** : Node.js, Express.js, JWT, Socket.io, REST APIs, FastAPI, Redis, Python
- **Database**: MongoDB, MySQL, PostgreSQL
- **Cloud & Tools**: Cloudinary, Git, GitHub, Docker, CI/CD
- **AI / Gen AI**: LangChain, LangGraph, LLM

PROJECTS

1 Appointly AI Powered Hospital Appointment & Support System

09-07-2026

Live: <https://saasaif.onrender.com/>

- Built a conversational AI chatbot using LangChain + LangGraph for a RAG pipeline over ChromaDB, with an intelligent routing layer directing queries between PostgreSQL (structured data) and RAG (unstructured knowledge) — reducing appointment lookup time for staff and patients.
- Delivered full appointment lifecycle management (CRUD, real-time search, role-based dashboards) with FastAPI backend and React.js frontend, secured via role-based access control.
- Containerized the system with Docker, used Redis caching for performance optimization, and automated email reminders to reduce missed appointments
- **Tech stack**: react.js,javascript,python,fastapi,postgres,langchain,langgraph,redis,docker,ci/cd,celery.

2. Class Attend

10-05-2026

Live: <https://classattend-mac-fm.onrender.com/> | [Video](#)

- Streamlined attendance tracking for HODs, teachers, and students by building a 3-tier RBAC system with drag-and-drop teacher assignment and CSV export reporting.
- Secured multi-role access across the platform by implementing JWT authentication and MySQL-based data modeling. Deployed a production-ready cloud database solution by migrating to TiDB, a MySQL-compatible distributed cloud database, on Render
- **Tech stack**: react.js,node.js,mysql,javascript,express.js

3. Skill Bridge

14-04-2026

Live: <https://skillbridge-inky.vercel.app> | [Employer: Video](#) | [Freelancer: Video](#)

- Enabled 50+ real users to post, filter, and apply to jobs by building a role-based platform with separate Employer and Freelancer dashboards, JWT authentication, and infinite scroll pagination.
- Improved hiring communication speed by integrating real-time chat via Socket.io alongside Cloudinary-based resume uploads.
- Shipped a production-deployed full stack app by architecting the system across Vercel (frontend) and Render (backend/API).
- **Tech stack**: react.js,node.js,express.js,mongodb,socket.io,pdf2
